

**FINANCIAL ASSURANCE
DISCUSSION AGENDA
NOVEMBER 17, 2020**

- Background on financial assurance
- Goals of group effort
 - Review approaches to determining financial assurance
 - Discuss real world examples
 - Discuss options for financial assurance assessment
- Approaches to determining financial assurance
 - DNR
 - U.S. EPA (long-term care)
- Other considerations
 - “Betterment” on top of engineering control
 - Capping in sediment zone between water’s edge and OHWM; conceptually different or same
 - Third-party actions, natural events, or both
 - Reductions in financial assurance – changed events/time
- Examples to work through
 - Capping around structural items (dams, fixed piers, bridges, historical structures, “river walls”)
 - Low velocity areas (quiescent areas)
 - High volume, low cleanup value sites
